

Lucio Ingargiola

Web Developer Trainee

Azul, Buenos Aires | Phone: 2281593861 | Email: lucioingargiola1@gmail.com

TUDAI student and Web Developer Trainee with solid logical foundations. I have practical knowledge in Frontend and Backend, with a strong focus on best practices and maintainable code. I stand out for continuous learning and seek my first experience in the IT sector to contribute to problem-solving in a collaborative environment.

Skills & Competencies

- Front-End Development: React, Next.js, Angular, JavaScript, HTML5, CSS3.
- UI Design: Tailwind CSS, responsive layout, Figma-to-code design integration.
- Tools & Environment: Git, GitHub, continuous deployment (Netlify / Vercel), NoSQL databases (MongoDB).
- Analytical problem-solving: Effective debugging and design of scalable code architectures.
- Agile learning (Fast-Learner): Quick assimilation of new technologies, libraries and technical documentation.
- Interdisciplinary work: Assertive communication for seamless integration with Design (UI/UX) and Backend teams.

Development Projects

- Personal UI/UX Portfolio | Front-End Development: Design and development of a high-performance web interface focused on conversion. Architecture based on reusable components, implementation of Dark Mode and optimization of Core Web Vitals. Tech stack: Next.js, React, Tailwind CSS.
- Interactive Digital Menu | Gastronomic Web App: Development of a mobile-first UX web application for ultra-fast access via QR code in a physical environment. Clear interface design to facilitate user purchase decisions. Tech stack: Next.js, Tailwind CSS (and Google Sheets API / CMS if implemented dynamically).

Education

University Technician Degree in Computer Application Development (TUDAI)
2021 – Present | UNICEN – Tandil Campus.
Web Development Course
2025 | CFL No. 401 Azul
Web programming, Frontend and layout.
Web Development Course
2020 | Alicante (Spain)

Technical Skills

Languages & Frameworks: JavaScript, React, Next.js, Angular, Java, HTML5, CSS3.
Development Tools & UI: Git, GitHub, Tailwind CSS, MongoDB, continuous deployment (Vercel / Netlify).
Methodologies & Management: Trello, Slack, Google Workspace.
Languages: Technical English (fluent reading of documentation and tool usage).
